Home Improvements With Top-Notch Service

By JASON PAFUNDI

Founded in 1919 by Morris Kersch, Major Homes is a fourth-generation home improvement company with a showroom in Bayside and a home office in Williston Park.

For more than nine decades, the company has specialized and excelled in all areas of remodeling and construction. Licensed, insured and bonded, and with over 100,000 clients, Major Homes is one of the Tri-State area's largest remodeling companies.

According to the company, the key to a successful future begins with a satisfied customer today. The company's top priority has always been first-class service and an unwavering promise to give expert advice, deliver work of the highest quality and guarantee customer service that is second to none. The guiding principles of the company were crafted to ensure that custom-

ers are always treated the same way that employees would like to be treated.

Their pledge to give top-notch service includes a guarantee to provide worry-free home improvements to customers seeking outstanding value for their homes. They offer the best products available in the industry, display the products in a no-pressure, customer-friendly showroom, provide education and training to ensure that all their employees are knowledgeable and friendly and work exclusively with quality-conscious craftsmen who treat the customers' home better than their own.

Among the services offered are windows, sliding, dormers and extensions, roofing, doors, kitchens, bathrooms, gutters and leaders and computer imaging.

At Major Homes, they offer every brand of window in order to give the customer every option. A team of experts will

work with the customer to find the material, size and model that best fits their needs, and before any decision gets made, the customer will be introduced to a full range of products to assure them that the company's attention is second to none. Whether the project requires renovation or simple replacement, all the windows are custom-sized and ready to install.

The window the customer wants is the window Major Homes offers, in any material including vinyl, wood, aluminum, composite or fiberglass. The client can also choose from a quality selection of interior colors and woodgrains to complement the windows. New construction and direct replacement option are available, so customers can be assured that no matter the demands of the project, Major Homes will find the solution that fully realizes the clients vision.

With the ever changing

weather, from rain and wind to sleet and snow, homeowners in Queens realize the importance of quality roofing, and Major Homes does too. The roof can mean the difference between relief during a hurricane or other bad storms or a repair headache that can last for months.

As with all their products, Major Homes offers every brand of roofing to give the customer every available option. The company's experts work with the clients to make sure they understand the state of their roof and determine what the renovation requires. Regardless of the size of the project, Major Homes offers a large guarantee — that the roofing will withstand the toughest of conditions.

The options for roofing include asphalt, wood and metal. All of the products are heavy duty and ensured with the highest warranties, and

before a project begins, Major Homes will assess the condition of the roof, replace all rotten wood and install protective house wrap.

Everybody loves a new kitchen and at Major Homes, not only will customers get a kitchen they love, but they will love the company that builds it too. The company understands that the kitchen is a major focal point in the home, so they treat every kitchen renovation with the time, attention and preparation needed to ensure that the final product exceeds the client's expectations.

Major Homes has two convenient showrooms, does not use day laborers and accepts credit cards. Kersch also welcomes emails — mkersch@majorhomes.com — from anyone with a comment, good or bad.
